

The Hospitality Committee for United Nations Delegations

is pleased to invite you to

Learn to Create Your Own App

(Ages 13 - Adult)

On

Tuesday, August 11, 2020

1:00-2:30 P.M.

Mobile Applications, or simply Apps, are very popular and became an essential part of our daily lives. Join us when **Mariam Tamimi**, *Faculty member at United Nations International School*, will give an introduction on how to create your own app in JavaScript using either block-based programming or text. First, you'll be introduced to designing user interfaces and writing event-driven programs in the App Lab tool offered by code.org. Then, you will have some time to design your own app. Depending on the number of participants, we might have a chance to practice pair programming. No need to install any software, just have a computer with an updated browser.

To register, email HCUND at hcund@un.org
